

TECHNICAL TRAINING

# Websense<sup>®</sup> Product Training

COURSE:

**WSGA**  
Professional

The rapidly expanding fields of cyber security and information technology have lead to a difficult environment for both practitioners and organizations. Maintaining either individual skills or a fully capable team requires frequent training. At Newberry Group, we offer Websense training courses to help your skills keep pace.

**OVERVIEW:**

During this four day training course, you will learn how to configure the WSGA advanced features, perform basic troubleshooting, and deploy and manage the TruHybrid component. Through classroom instruction, demonstrations, and hands on lab practice exercises, you will learn how to effectively manage Web Security Gateway Anywhere across multiple sites and deployment scenarios. Additionally you will learn how to manage advanced integration with Web data loss prevention (DLP) and the roll out the Websense TruHybrid functionality.

**COURSE OBJECTIVES:**

- Understand the Web Security Gateway Anywhere architecture
- Configure explicit proxy
- Configure transparent proxy
- Configure multiple methods of identification and authentication
- Configure advanced scanning features
- Configure tunneled protocol detection
- Configure SSL content inspection and category bypass
- Configure policies and filters
- Understand how to implement TruHybrid

**INTENDED AUDIENCE:**

Customers: system administrators and managers who are responsible for configuring and tailoring Websense WSGA

**DURATION:** 4 days
